EXECUTIVE SUMMARY

My name is Rizky Al – Amin, I am an information systems student at Jambi University. Currently in semester 4, I have created various projects with my team. On every project I work on, I can be flexible to be on the frontend or backend to follow the flow of my team. I can create responsive websites, compatible with all browsers, clear, simple and consistent navigation. I can also adapt to the projects I work on. Several times I have been interested in data processing and data analyst, I am still at the stage of self-taught learning through several websites. In team projects, my team can also rely on me to direct the team's work and ask for opinions and solutions.

EDUCATION

Information System, Jambi University

August 2022 - Present
